

Casing

The diagram illustrates the radial displacement of a turbine casing and blade. At the top, a horizontal dashed line represents the casing, with the label "Casing" above it. Below this is a solid horizontal line. An upward-pointing arrow between these lines is labeled $u_r^c(\vartheta)$. Below the solid line is a U-shaped dashed line representing a blade, with the label "Blade" below it. A downward-pointing arrow from the solid line to the top of the blade is labeled $u_r^b(\vartheta)$.

$$u_r^c(\vartheta)$$

$$u_r^b(\vartheta)$$

Blade
